

# Stick Tip Hair Extensions

Stick tip or I tip hair extensions are pre bonded 100% human hair extensions. This is one of the safest techniques. The Stick tip bond is applied very easily to your natural hair using a micro ring or shrinkie tube which is secured using a smooth jaw plier. All micro rings we supply are colour coded so they are virtually undetectable and blends beautifully to your natural hair colour. The stick tip extensions system does not require any heat, glue, keratin, bonding, or sewing and because of that it eliminates damage your hair. Just another way to look beautiful with ease!

We offer a wide range of colours shades from four different lengths from 14 inches up to 22 inches, and other weights such as our ever popular 1 gram range.
